evaluating research 3e provides students with the skills to read and evaluate research studies aimed at courses where it will be more important for students to read than conduct research this book covers all aspects social behavioral and health science research from the ground up as well as main types of research methods

aids students in understanding and interpreting quantitative research articles designed for anyone who needs to learn to read and understand empirical reports in the social and behavioral sciences this multidisciplinary book provides individuals with the knowledge necessary to understand research without overwhelming them with information about how to conduct research his enthusiasm for methods present on every page author francis c dane

wants readers to have the skills to evaluate research and critically use empirical results readers will gain a greater appreciation for the ways in which consuming research can add to their understanding of the way the world works and how they can enhance their efforts to improve it key features every facet of evaluating research is covered from key terms and concepts to communicating the final results the author pairs statistical concepts and procedures with appropriate research methods strong pedagogy such as chapter overviews summaries key terms and application exercises allows readers to check their understanding of the material this book can be used in both upper level undergraduate and graduate level courses in public policy public health education sociology psychology social work and nursing

evaluating research in academic journals is a guide for students who are learning how to evaluate reports of empirical research published in academic journals it breaks down the process of evaluating a journal article into easy to understand steps and emphasizes the practical aspects of evaluating research not just how to apply a list of technical terms from textbooks the book avoids oversimplification in the evaluation process by describing the nuances that may make an article publishable even when it has serious methodological flaws students learn when and why certain types of flaws may be tolerated and why evaluation should not be performed mechanically each chapter is organized around evaluation questions for each question there is a concise explanation of how to apply it in the evaluation of research reports numerous examples from journals in the social and behavioral sciences illustrate the application of the evaluation questions and demonstrate actual examples of strong and weak features of published reports common sense models for evaluation combined with a lack of jargon make it possible for students to start evaluating research articles the first week of class new to this edition new chapters on evaluating mixed methods research evaluating systematic reviews and meta analyses program evaluation research updated chapters and appendices that provide more comprehensive information and recent examples full new online resources test bank questions and powerpoint slides for instructors and self test chapter quizzes further readings and additional journal examples for students

this thoroughly updated new edition of the bestselling text trains students potential researchers and consumers of research to critically read a research article from start to finish containing 25 engaging samples of ideal and flawed research the text helps students assess the soundness of the design and appropriateness of the statistical analyses

this supplementary guide is for students who are learning how to evaluate published reports of empirical research numerous excerpts from journals in the social and behavioral sciences provide examples that allow students to learn the practical aspects of evaluating research by de-emphasizing jargon this book allows students to begin evaluating research with confidence new to this edition two new chapters on evaluating results sections of research reports one for

quantitative research chapter 10 and one for qualitative research chapter 11

a supplementary guide for students who are learning how to evaluate reports of empirical research published in academic journals your students will learn the practical aspects of evaluating research not just how to apply a laundry list of technical terms from their textbooks each chapter is organized around evaluation questions for each question there is a concise explanation of how to apply it in the evaluation of research reports numerous examples from journals in the social and behavioral sciences illustrate the application of the evaluation questions students see actual examples of strong and weak features of published reports commonsense models for evaluation combined with a lack of jargon make it possible for students to start evaluating research articles the first week of class the structure of this book enables students to work with confidence while evaluating articles for homework avoids oversimplification in the evaluation process by describing the nuances that may make an article publishable even though it has serious methodological flaws students learn when and why certain types of flaws may be tolerated they learn why evaluation should not be performed mechanically this book received very high student evaluations when field tested with students just beginning their study of research methods contains more than 60 new examples from recently published research in addition minor changes have been made throughout for consistency with the latest edition of the publication manual of the american psychological association

drug utilization research dur is an eclectic scientific discipline integrating descriptive and analytical methods for the quantification understanding and evaluation of the processes of prescribing dispensing and consumption of medicines and for the testing of interventions to enhance the quality of these processes the discipline is closely related and linked mainly to the broader field of pharmacoepidemiology but also to health outcomes research pharmacovigilance and health economics drug utilization research is a unique practical guide to the assessment and evaluation of prescribing practices and to interventions to improve the use of medicines in populations edited by an international expert team from the international society for pharmacoepidemiology ispe dur is the only title to cover both the methodology and applications of drug utilization research and covers areas such as health policy specific populations therapeutics and adherence

the handbook is heavy on methods chapters in different genres there are chapters on actual methods that include methodological instruction and examples there is also ample attention given to practical issues including evaluation writing ethics and publishing with respect to writing style contributors have made their chapters reader friendly by limiting their use of jargon providing methodological instruction when appropriate and offering robust research examples from their own work and or others

much applied research takes place as if complex social problems and evaluations of interventions to address them can be dealt with in a purely technical way in contrast this groundbreaking book offers an alternative approach that incorporates sustained systematic reflection about researchers values what values research promotes how decisions about what to value are made and by whom and how judging the value of social interventions takes place the authors offer practical and conceptual guidance to help researchers engage meaningfully with value conflicts and refine their capacity to engage in deliberative argumentation pedagogical features include a detailed evaluation case bridge to practice exercises and annotated resources in most chapters and an end of book glossary

as one of the most recognized names in the fields of language assessment and applied linguistics lyle f bachman has produced a high volume of scholarly articles and books in the field of language assessment these writings have strongly influenced the discipline and over the last three decades have played an uncontested role in shaping the field as we know it today until now bachman s work has been spread across various mediums and not existed in one place the writings of lyle f bachman is the first book to assemble bachman s work into a single comprehensive volume the collection is composed of seven major sections each beginning with an introduction by the editors to provide context for the papers the sections cover some of the most complex topics in the field including validity and validation the effects of test task characteristics interfaces between language testing and second language acquisition and epistemological issues in applied linguistics the collection concludes with a state of the art paper and insightful reflections about the field of language assessment the collection traces how bachman s ideas and research insights have evolved throughout the years given bachman s strong impact on the field of language assessment this volume presents not only a collection of the writings but also gives an overview of the ongoing issues and debates in the field this book will be useful to both researchers and graduate students in the areas of language assessment and applied linguistics

includes section book reviews

for courses in research methods in education understanding and evaluating research third edition is a supplemental textbook appropriate for all courses in educational research a reader this text contains quantitative and qualitative educational research articles from a variety of professional journals with each article is a sample article analysis and exercises that help students become better consumers of research the third edition is greatly enhanced by the inclusion of a new chapter on mixed method designs and two mixed method studies revised and expanded discussion of qualitative methods more emphasis given to randomized designs revision of research typology and features eight new articles
