a well written and stimulating excursion into postmodern education parker s challenge to critical educational theory can in the long run only help the left rethink and deepen its political project peter mclaren university of california los angeles this is a book about two stories of education in one story there is a vocabulary of means efficiency bureaucracy inspection and science in the other one of autonomy democracy emancipation and action research one is the story of positivist managerialist approaches to education the other is the story of reflective teaching this book displaces both of these stories by applying the techniques of deconstruction stuart

parker overturns the assumptions common to both of these positions and in doing so jettisons some widely cherished beliefs about education autonomy and rationality moving beyond current debates this book articulates a new manifesto for education in postmodernity and highlights the implications for educational practices and institutions

essay from the year 2013 in the subject politics general and theories of international politics grade 80 100 university of leicester language english abstract peace and international cooperation may not be sustained on a permanent basis simply by virtue of the illusory belief that states will invariably seek to preserve these ideals merely because they allegedly benefit the international community as a whole neither will their presumed adherence to a superior code of morality ultimately suffice on its own to protect the international order from major disruptions caused by the actions of one of its constituent sub units as e h carr remarked ethical standards cannot exist independent of politics in particular not without setting them in proper relation to the less abstract determinants in international relations notably power it was such a separation of power from morality which led politicians of the inter war period to believe that international cooperation could be perpetuated solely through the establishment of institutions designed to resolve inter state disputes within an international society whose members supposedly all shared the same goals even though in reality they clearly didn't still as carr acknowledged attempts to root moral ideals within the international order need not necessarily suffer the same fate they did in the run up to world war ii importantly however one must first become alive to the highly sensitive constellation of power and morality ultimately required to prevent the international system from giving rise to such forces as might before long prove a potential source of its own instability
